4 minutes

Color:

 TerraCotta

Pegasus Footprint

Taffeta nylon, 1500 mm water column,
covers tent and vestibule.

Weight: 19.8 oz / 560 g

PEGASUS

The tent for four with space for more.

a > Exterior, continuous and color-coded pole sleeves that come sealed at an end and with easy to use adjustable pole tensioners, make setup and teardown quick and easy. One person alone can set up Pegasus.

b > Two high doors found in the front and one at the rear for easy entry and exit. Two vestibules offer enough space for packs, wet boots and other gear you don't want within the tent.

c > Only 3 stakes are required for a basic setup. Ample pre-mounted Dyneema cord guylines secure the tent in stormy conditions. Stake placement is made easy with large and adjustable Dyneema cord loops.

d > Seven individually adjustable vents (1 front, 2 rear and 4 on sides) placed on all sides of the tent insure excellent ventilation. Vents are supported by pole repair segments.

e > Snow flaps, weighed down by rocks, sand or snow, keep Pegasus steady in storms. They also keep wind, snowdrift and bugs outside, where they belong. They can be rolled up when not required.

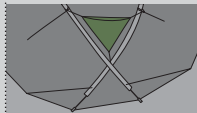

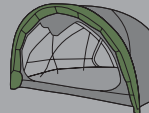

f > Pegasus has the capacity to sleep 4 adults, but with its steep walls that maximize interior space it can accommodate visitors during the day. With its high doors, entry and exit is easy without having to crawl. Numerous pockets along the walls and entrance keep personal items organised. A gear loft in the canopy roof for additional storage space.

> Editor's Choice

Award 2009, granted by the Germany Outdoor-Magazine: „function and features make this the perfect 4 season tent for 3-4 people. 4 minute setup time is a record for a tent in this category.“

> The vestibule can be **rolled up** for unobstructed views. The doors have a hanging design preventing them from being stepped on when open. They can be operated with just one hand and stow away in a roof pocket when open.

> Other Exped innovations include **detachable mesh pockets** that can be clipped to the outside of the rainfly. These are ideal for drying gear or storing small items during the day that should be kept within easy reach.
